Here I am, Lord   from www.traditionalmusic.co.uk

```
I, the Lord of sea and sky,
I have heard my people cry.
All who dwell in dark and sin
My hand will save.
I who made the stars of night,
I will make their darkness bright.
Who will bear my light to them?
Whom shall I send?
Here I am, Lord. Is it I, Lord?
I have heard You calling in the night.
I will go, Lord, if You lead me.
I will hold your people in my heart.

I, the Lord of snow and rain,
I have borne my people's pain.
I have wept for love of them.
They turn away.
I will break their hearts of stone,
Give them hearts for love alone.
I will speak my Word to them.
Whom shall I send?

I the Lord of wind and flame,
I will tend the poor and lame.
I will set a feast for them.
My hand will save.
Finest bread I will provide
Till their hearts be satisfied.
I will give my life to them.
Whom shall I send?
Here I am, Lord. Is it I, Lord?
I have heard You calling in the night.
I will go, Lord, if You lead me.
I will hold your people in my heart.

St. Columba is one of the psalters set in a medallion at the end of the preamble. Three other psalters, also by McLaughlin & Reilly, are also part of the Catholic Hymnal. Dow Jones & Company, Inc. 2300 Market Street, Box 2040, Philadelphia, PA 19101-8020 (213) 955-1052. Implementation and evaluation of a clinical audit pilot in a specialist palliative care service. To evaluate a clinical audit pilot in a specialist palliative care service. The evaluation is guided by a model of implementation and evaluation of interventions and evaluation of quality improvement projects. The project aimed to improve the care of patients requiring intubation following hospitalisation, and so impact overall ventilatory management. The clinical audit target was to reduce in-hospital mortality. The clinical audit consisted of audit cycles for 25-day blocks and allowed for feedback to be given to clinicians. Through reviewing these audit cycle, a 'before' and 'after' assessment of care in the pilot service was completed. Outcomes include incidence of intubation, in-hospital mortality and the impact on quality of care. The project is being implemented with three acute hospitals and three palliative care services, with final evaluation after three months. The majority of patients admitted to the service have a palliative care consult. The clinical audit pilot showed that: (1) implementation of the audit project was acceptable to the clinical and managerial staff; (2) the project was feasible and effective in reducing the mortality risk; (3) there was an improvement in key outcomes. Following implementation of this project, a number of changes in processes, structures and service planning occurred, resulting in the refinement of processes to ensure that the clinical audit criteria were considered in each decision-making process. The clinical audit pilot in a specialist palliative care service is feasible and has the potential to improve patient care. This project has had an impact on service planning, with refinement of processes to ensure that clinical audit criteria are incorporated into all decision-making processes.package com.sequenceiq.cloudbreak.cloud.event.deploy; import java.util.ArrayList; import java 82157476af
